

GENERAL DESCRIPTION

Flex-Flash MB is a high quality polymer modified bitumen flashing sheet, reinforced with both a polyester scrim and glass fiber mat. The product contains a white/gray UV resistant granular top surface and a lightly sanded underside.

BASIC USE

Flex-Flash MB (modified bitumen) is typically used as the exposed, torch-applied, flashing membrane in conjunction with Hydrotech's Monolithic Membrane 6125 roofing in Inverted Roof Membrane Assemblies (IRMA).

SIZES

The Flex-Flash MB membrane is available in roll form, 39.4 inches (1.0 m) wide by 33'-4" (10.2 m) long, covering approximately 100 square feet (9.29 sq.m.). Each roll weighs approximately 100 pounds (45.36 kg).

TECHNICAL SPECIFICATIONS

PROPERTY	RESULT
THICKNESS (in., nominal)	0.180 (4.5 mm)
TENSILE STRENGTH (lb./in., min.)	150 MD; 150 CD
LOW TEMPERATURE FLEXIBILITY (@ -20°C)	No cracking, PASS
REINFORCEMENT WEIGHTS (lb./sq.in.)	1.5 Fiberglass Mat 0.91 Polyester Scrim
