

GENERAL DESCRIPTION

Hydrotech LiteTop soil is a specially blended lightweight growing medium composed of organic and mineral materials. The percentage of organic and mineral materials is designed based upon the type of vegetation planned – extensive, semi-intensive or intensive.

BASIC USE

Hydrotech LiteTop soil is specifically designed to be used on Hydrotech's Garden Roof® extensive, semi-intensive and intensive assemblies. It can also be used as the growing medium in typical planter applications.

ADVANTAGES

- Provides a stable substrate for the vegetation
- Excellent moisture and nutrient retention
- Does not compact and drains excess water quickly
- Lighter in weight than typical clay based soil
